

Please note:

When measuring for a window, you are trying to determine the size of the opening in which to fit the window. The opening is the area inside the jambs. The jambs can be made of concrete, wood, steel, etc.

Please follow the guidelines below for measuring your windows.

PLEASE NOTE: WE ARE UNABLE TO ACCEPT RESPONSIBILITY FOR INCORRECT MEASUREMENTS. IT IS RECOMMENDED THAT YOU CONSULT A PROFESSIONAL.

If you find that additional pages are needed, please feel free to print more of the form page as necessary to suit your needs. Number where you see a '#'.

**Step 1:
MEASURE THE WIDTH OF WINDOW
OPENING**

Measure and record the width between the side jambs at the top, middle and bottom of opening.

Record the lowest measurement.

**Step 2:
MEASURE THE HEIGHT
OF WINDOW OPENING**

Measure and record the height between the top and bottom jambs at the left, middle and right of opening.

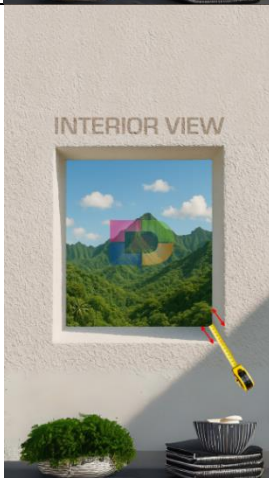

Record the lowest measurement.

**Step 3:
MEASURE THE DEPTH OF WINDOW
OPENING**

Measure between the interior and exterior stop.

Record this measurement.

Please go to the next page to fill out form.

NOTE:

Are measurements requested **finished masonry opening (FMO)** or as built?
 Windows need to be 3/8" less on W & H from FMO for installation tolerances
